

Testimonial on Improvement with Ulcerative Colitis, High Blood Pressure, and Asthma

Hi,

I was asked to share my story with you, and I hope that it may encourage some of you to take a leap into your search for better health.

I'm currently 45 years old and have been suffering from many health complications. I have asthma, ulcerative colitis and high blood pressure.

My blood pressure, even with my prescription, was usually a little elevated but under control, my asthma had been acting up more often as time went on, but my colitis had been bleeding and painful for almost two years straight. I preferred the pain of hunger over the intestinal pain. Anytime the doctors tried to cure one problem, my body had a bad reaction with a different one (i.e.- I became very weak and exhausted from the lack of nutrition, bleeding and pain so the doctors advised me to stay in bed and rest which resulted in the development of painful blood clots). The doctors no longer had any idea about how to treat me, so they set up an appointment with a specialist and I had a colonoscopy performed. The specialist showed us (my wife and me) the pictures of the colon and stated that they were very bad and that he didn't even know what some of the spots were, for he had never seen anything like them before and also that the problem went through the entire large intestine. He stated that it had not spread into the small intestine yet and thought it best to have the affected area removed, but could not guarantee that the problem would not affect the small intestine if the large one were removed. I really didn't want that alternative at this point in my life, so I began seeking advice from the alternative medicine field.

I had some tests done to try to find the possible root of my problem. One of the tests performed was a food allergy test, which I found very helpful so that I knew what foods to avoid so that my body wouldn't combat so many allergens and could work on repairing whatever was causing my health problems.

Another test that was performed showed that I had a yeast infestation in my colon. I began looking into a possible cause for that problem and found that antibiotics are a common cause of yeast related problems. I had allergy problems when I was young and took a lot of antibiotics. When I was in the eighth grade, I had my first colon flare-up with blood in the stool. The conventional doctors' tests were as unable to find the cause then as they are yet today. It seemed to disappear, but came back more often, last longer and attack with more aggression as the years went on until it didn't go away at all.

I did receive help from the alternative medical field to help reverse the yeast problem, but my immune system was still depleted and could not begin the healing process on its own.

Eliminating the foods from my allergy list did help me some also, but it did not stop the bleeding and cramps. A friend heard that I was having problems and told me about Immunocal, and gave me some information. After looking over the literature, attending one of the meeting and having my questions answered I decided to give Immunocal a try. After all, I did not have much left to lose. My health was on a severe downward trend.

I began using the product toward the end of the summer of 2001. After using the product for a day, the ringing in my ears ceased. I began feeling more energetic after three days of use. My energy kept slowly improving and after using the Immunocal for five weeks the bleeding stopped, which is something that the doctors weren't able to do for almost two years. I still need to watch my diet by staying away from the allergic reaction foods, but have been able to reintroduce some of them, but I make sure that I do it in moderation. My colitis reacts very badly to milk, but Immunocal is easily accepted. My asthma attacks are decreasing and becoming less severe. I haven't stopped taking my blood pressure pills, but have to admit that my blood pressure is better yet since I began taking the Immunocal.

The doctors told me that the sulfa drugs would turn my hair gray, and I can't say that this product will do this for everyone, but my hair is getting it's natural body and color back to it, which changed more than ten years ago. The doctor s also had me on steroids, and other than my liver, I'm not sure what other effects it had on my body. I have discontinued the sulfa drugs and can say that the Immunocal has worked better than what the doctor s had hoped their drugs would do.

In October of 2001, I had an opportunity to meet Dr. Jimmy Gutman, who has done a lot of research for this product. I found this man extremely knowledgeable and could see his desire is to heal our bodies. I can also say that along with Dr. Gutman, the Immunotec staff and representatives have been helpful and caring.

I would also like to take this time to say THANK YOU to Dr. Gutman, Mel, Ellen, Leslie, Winnie and my family for your dedication, time and love.

I hope and pray that this helps to encourage some of you to just try some of these products for your health's sake.

Sincerely,

Mike Moser
