

February 10, 1997

To Whom It May Concern,

Our 6-year old boy, Eric, has had weeping eczema all his life. We have taken him to different doctors throughout Alberta and tried many different skin creams on him.

The winter is the worst time of the year for Eric because of the low humidity and this is when his eczema would make his skin crack and bleed the most.

We started giving Eric 1 level teaspoon of HMS/90 (Immunocal) mixed in milk everyday. **FOUR days** later, his eczema was 98% gone. There was just a little bit of cracking that showed up on the bottom of his feet.

Eric was started on his HMS/90 (Immunocal) in the middle of December 1996. As you can see, this letter is being written on February 10, 1997.

Needless to say, my wife and I are very pleased with the results Eric has gotten from this product.

Yours truly,

Carl Walper
Hanna, Alberta
