

Testimonial on Immunocal and Emphysema

Date: November 12, 2001

**Subject: Steve Maloney 80 years of age, long time smoker with a severe lung condition!
Taking Immunocal for the last eighteen months.**

I want to talk about my husband Steve Maloney's reaction to the new immune system product HMS-90/Immunocal. He suffers from a disease called emphysema, resulting from prolonged use of cigarettes. Steve was constantly coughing and choking to the point of falling on the floor on numerous occasions. He was on stool softeners, oxygen, prednisone and nerve pills. His breathing was so labored that he would perspire a lot during the day and become very irritable.

He started taking HMS- 90/Immunocal, one pouch a day, in yogurt, with his Doctor's approval. The Doctor was quite impressed with the research behind this product. After a short period of time, he has had great results. Within one month we noticed improvements in Steve's health. We have not changed or added anything else to Steve's routine or diet. The first thing was that Steve stopped taking the stool softeners.(problem seems to be gone). His coughing and choking have been reduced tremendously, lessening the amount of perspiration. Steve has been on this product now a year and a half. The change in his health has been remarkable. He has been able to reduce all his medication by nearly half. He is off the nerve pills and prednisone altogether. The oxygen (ventilator) that he was taking has also been cut in half. His breathing is much improved, in spite of the fact that he is still smoking. His energy is truly much better.

We are all very happy with the results we have seen so far. Steve's doctor thinks that his health would improve even more with HMS- 90/Immunocal, if we could get him to stop smoking. Overall we would highly recommend this product to everyone, especially people with lung problems. (lung diseases)

PS: Last week, Steve was able to attend church with me for the first time in a year. He is so much better emotionally as well. This improvement has been so much of a relief for me as well. It's very amazing. By the way, there is "NO" placebo effect as Steve didn't realize for many months that he was even taking HMS-90/Immunocal. He now knows and can't wait to get the drink I mix for him everyday.

Sincerely,

Pauline Maloney
