I love my XtraSharp. I've been take it first thing in the morning just before my work out. The first benefit I noticed is how it helped me give up coffee! I do love my coffee in the morning; however it was giving me an upset stomach. So I changed my routine and started taking my XtraSharp first thing and then going to the club for my workout. I had no withdrawals ... I've given up coffee many times always with a few days of headaches and cravings... not this time!!!

What I noticed from my workout is my focus. Yes, I do have more energy, however it's brain energy!!! My focus is sharp and my mood is elevated.

Unlike coffee, sugar or ephedrine there is no come down. The energy boost is smooth and natural, never a crash!

And this is the best. One day a few weeks ago I was having a gathering at my home.. I hadn't eaten all day so I grabbed a couple of cookies...big mistake. I hadn't had sugar for some time, and my reaction was a terrible headache. I had a bright idea that XtraSharp would help. It was late in the afternoon, around 5:00 PM so I was concerned about not being able to sleep so I only took 1 teaspoon instead of the recommended dose of 1 ounce. One teaspoon and my headache was gone in 5 minutes...

XtraSharp is a magic elixir not just an energy drink!! It's a dream come true. A fast acting product that makes a difference in someone's life.

My name is David Vaught and I am an Insulin dependent diabetic and a cancer survivor, (thank you Immunocal). I also use XtraSharp on a daily basis. It gives me energy, stamina and makes me feel good. There are no side effects and it does not raise my blood pressure, increase my heart beat or interfere with my eating and insulin usage. But it does help me to maintain a good positive energy and attitude allowing me to absorb what ever the day brings my way without getting stressed out. XtraSharp is an excellent product to assist one in getting through the day, especially those long hard days.

Regards,

David E. Vaught, California

I am looking forward to getting my order. I have to admit that when I asked for your free sample I didn't really believe that it would work. I have tried many things for energy, but they just haven't worked. When I talked to you I was skeptical, but I was willing to see if your product would really give me the energy I needed to get through the day. When it came in the mail it was late so I decided to try it the next day. I had my usual coffee and was at the time of day when I feel real tired, (late morning). I took the "XtraSharp" and waited. Boy was I surprised when it really worked. I called and ordered it that day. I used the 2nd "XtraSharp" the next day with the same results. Thank you.

Susan, California

"I love to take XtraSharp right before my work out, it gives me a huge boost of energy and I have a better work out" ... Monica Davis Vancouver, Washington

---

Every morning before I take my walk I take a pouch of HMS90 (Immunocal), OJ and a splash of XtraSharp. I can keep up with the dog:)) When I get back from my walk it is time to make lunches, get kids off to school and buzz around doing all the 'Mom' chores. I occasionally slip in a round of golf - walk and carry! Come home, be a Mom again - make dinner and get the kids off for their evening activities. Because my one child plays hockey and lives 2 hours from us - I must be able to be alert for the long drive home after games. Those nights I take another 'shot' at supper and sleep like a baby all night long.

Being in my mid 40's, I want to live the life of an 'energized bunny' With XtraSharp I have accomplished that.

My name is Wellington E. Watts, II, and I live in Glassboro, N.J. and am presently teaching at Ambassador Christian Academy.

Since I write music too, naturally my slogan has become: Don't BFlat when you can BSharp -- XSharp!

I begin each morning at 6:00am with breakfast. I take about 2 tablespoons of XSharp around 6:15am. I arrive at school about 7:45am.

I have a lot of energy for the day. It gives me an advantage with the class because I have the energy to keep two steps ahead of them. At the end of the day, I still feel good and not depleted of energy.

What is significant about this is the contrast with last year. I would run out of energy by noon at times. When I got home, I'd hit the recliner for about a 30 minute nap -- totally exhausted. At 60 I now feel energetic and productive.

I don't know how what I'm about to say fits, but something unusual has happened. Saturday I returned home from getting my hair cut. My wife Nancy said," I don't believe this. I see new hair coming in and its black. You are not nearly as gray." What's doing this I don't know, but I'll take this little extra perk!

This is what I take --

- 6:15 am -- two tablespoons of XSharp
- 3:15pm (About) -- 2 packets of Immunocal in a little OJ
- 6:15pm (About) -- 1 tablespoon of Magistral

I use the face cream on two marks on my face I had removed. Thank God they were not cancerous or precancerous. The marks have almost faded away since August. I take the calcium and the multiple as well.

This is my everyday not-so-dramatic story of just plain feeling good! "I FEEL GOOD!"

---

I'm not a morning person. Like, really, really not a morning person. So, I tried XtraSharp in the morning. Five minutes later, I was dancing in the shower. I never dance in the shower. I never dance! I love this stuff. Now it's part of my daily morning routine.

I'm a police officer and a First Sergeant (soon to be a Master Sergeant) for the National Guard. To maintain my weight, I'm an avid runner. The first time I used XTRASHARP I ran the fastest time I've run for a long time. I continue to use XTRASHARP for the extra energy and endurance. I really like the pick-me-up feeling it gives me, without feeling jittery.

As for myself, I love XTRA SHARP. I don't need to use it every day, but on those hectic days when I start to run out of energy, I take only a ¼ of a Tsp. after lunch and feel great. I also like taking a little bit before walking (if I don't walk too late in the evening), as I'm able to pick up my pace and burn extra calories.

I have allergies and had been sick for a few weeks. I had been to the doctor 3 times and the coughing was getting worse – I was supposed to wait it out. I would cough so hard I would throw up. I don't care for the funky taste of XTRASHARP but nothing else was working so I gave it a try. The first morning I started to use it I was able to breath better, I felt more energy and my coughing improved. I started with 2 teaspoons a day and am taking less now. XTRASHARP has made a big difference for me.

I'm the world's biggest skeptic. I get so tired of hearing about the next wonder product. Most are all hot air. But, XtraSharp has proved to be very different. The simple truth is, it gives me more energy. I'm an avid runner and I stay very in tune with my body. I started taking 2 oz of XtraSharp before every run. Now I would never want to run without it. My runs are noticeably better with XtraSharp. The thing I like most about XtraSharp is the kind of energy it gives me. It's not jitters or nervous energy, it's more of a sustained energy that lasts all day. The other good thing is I don't feel a "down time" later in the day. Ok, even a skeptic like me can be convinced. XtraSharp is living proof.
